

~ CORNERBLOCKS ~

Corner blocks add impact to a trimmed opening while eliminating the need for mitered casing joints. This saves time during the trim's installation and creates an appealing entryway or window opening in the process.

Corner blocks fabricated by Blumer & Stanton are designed to mate with our stock profile casings.

Many of our designs may also complement a customer's own unique casing profile, without the expense of custom corner block fabrication.

The corner blocks included in this section are stocked in Honduras mahogany.

Although Honduras mahogany will accept a satisfactory paint finish, the impression it creates when finished either by stain or clear-coated natural is very lasting.

Modifications Available:

These corner blocks may be custom fabricated from most any wood species.

Blumer & Stanton fabricates custom corner blocks modified to a customer's specified dimension, upon request. These custom-sized corner blocks may utilize any of the following designs.

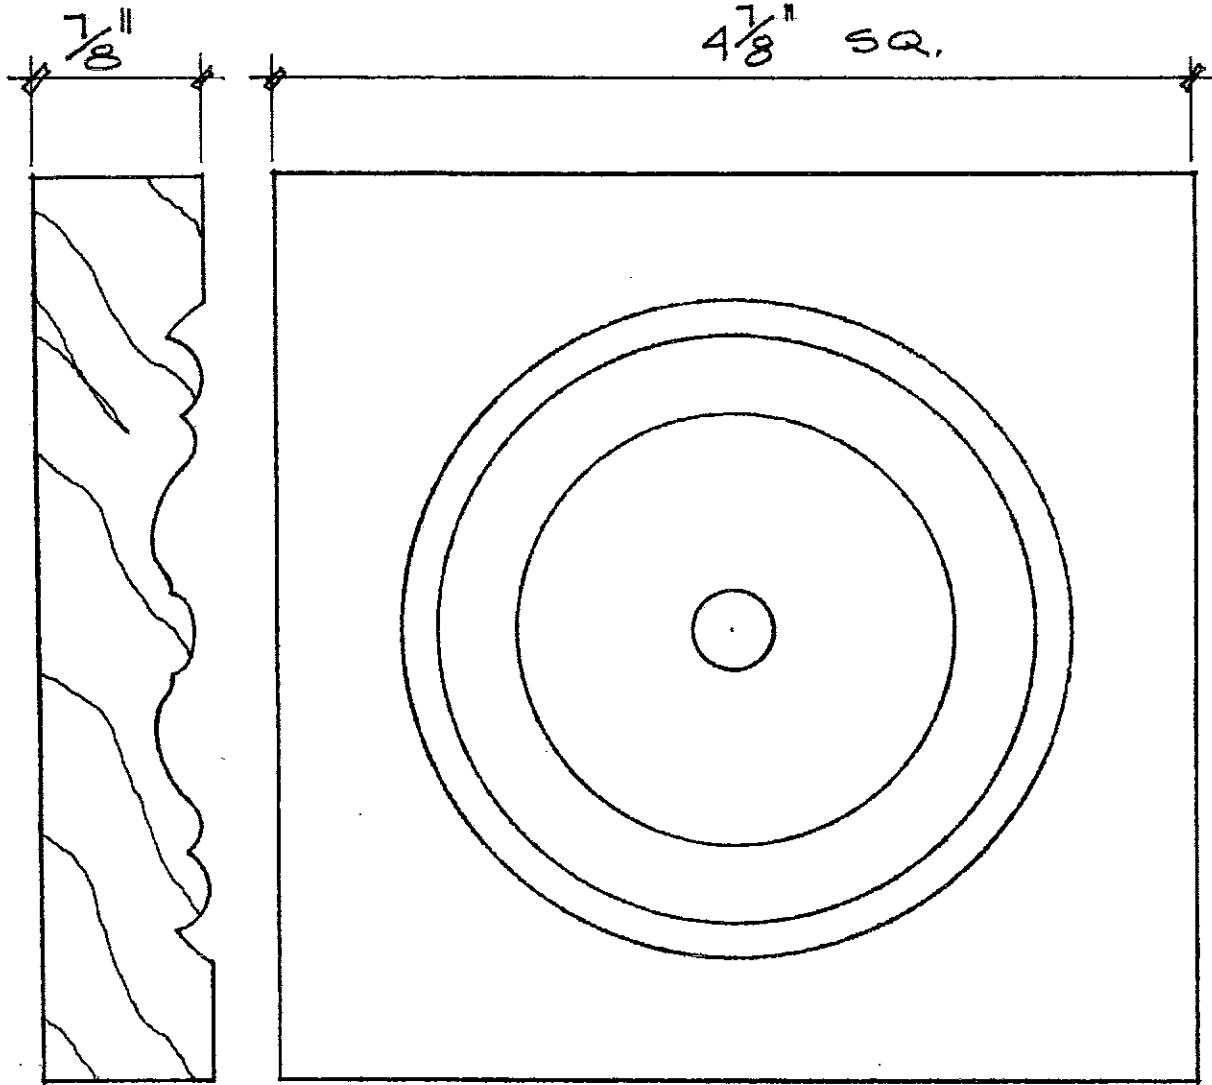

Other modifications available include a beaded edge similar to the one shown in illustration "CB-4BE", on page 60.
